

BUILDING AN INFRASTRUCTURE OF PEACE

WE ARE STRONGER TOGETHER!

Pillars 4 Dignity has partnered with Destination Peace and assembled a coalition of experts, community activists and other distinguished leaders to participate in monthly virtual panels. The coalition will address critical issues that include localized and globalized injustices and inequalities. We promote peace, leadership and the economic empowerment of young people and underrepresented groups in Maryland and beyond.

The social challenges we must address are complex and require innovation, creativity and dedication to resolve. We have brought together a diverse group of change-makers to build bridges and share constructive information to help achieve our goals. Let's learn from each other. We can only bring change in our communities by collective action and having one voice.

How is it possible for human beings to successfully travel into space, to land on the moon, to explore Mars, to create farmed raised fish and laboratory produced meat but humans are still not able to live in peace and harmony on earth.

How did we progress from the first wheel to a self driving vehicle, from a hovering wooden street lamp to satellites hovering over the planet, from ancient builders of empires to democracies, from the binding of books to Digital Firewalls, from life threatening plagues to life sustaining vaccines, from gunpowder to atomic bombs... with ingenuity, leadership, perseverance and grit.

Pillars 4 Dignity and Destination Peace is exploring the **mental health conditions** of humanity with the top neuropsychologists, scientists, global visionaries and evolutionary paradigm thinkers.

Host Naila Chowdhury CEO - Pillars 4 Dignity
Moderator Emanuel C Perlman - MSW, CSW Founder and CEO of Destination Peace
